# Shower Bases

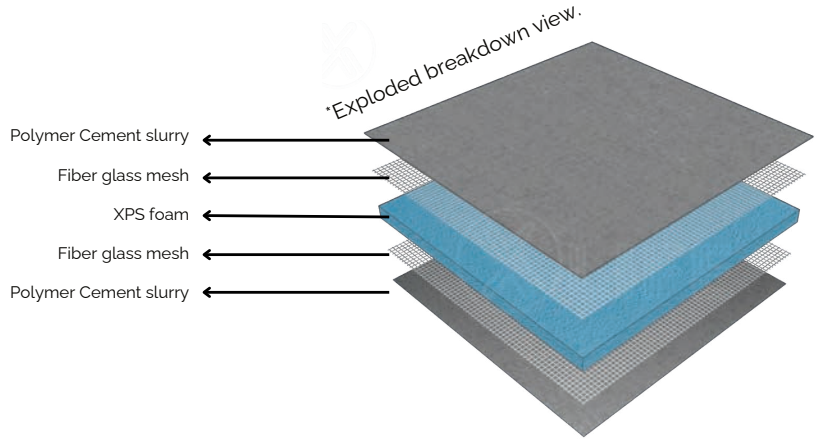

Your go-to solution for waterproofing your bathroom, shower, or wet room before tiling. With excellent water-repellent properties, these boards create a reliable shield against moisture. Their lightweight design and easy-cut features make installation a breeze. You can cover them directly with tiles, render, or plaster, offering a hassle-free process. Plus, their versatility allows installation on nearly all surfaces.

## Key Features

- Easy installation, 10 to 15 minutes and it is ready.
- Fast cure, tiles can be installed after 30 minutes depending on the fixing system.
- It can be installed with a linear drain, square drain or round drain.
- Excellent Thermal Insulation.
- Acoustically better than sand and cement.
- Easy cut to fit all designs.
- Perfect for all surfaces, including existing timber or concrete floors.

# Insulation Boards

They are pre-formed trays ready to be tiled over. Made from XPS foam core and strengthened cement fiberglass mesh outside layers, this gives the board strength, rigidity and helps the bond between the tile, adhesive and board.

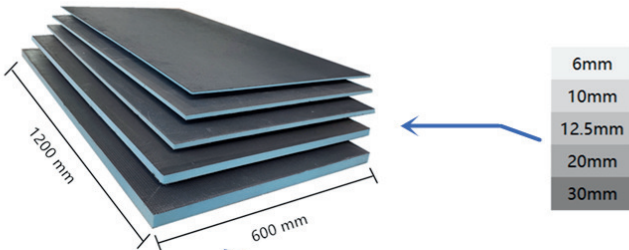

## Key Features

- 100% waterproof, made of HCFC-FREE XPS foam
- High-rigidity and durability
- Close bond to any tiling walls or floors
- Available at various thickness and sizes
- Compatibility to multiple substructures
- Vapor retardant against molds
- Lightweight, easy to handle and cut with utility knife

## Applications

- Attaching to masonry, concrete or plaster
- Screwing onto laths and supports
- Concrete floors
- Timber floors
- Under floor heating
- Bath tubs and shower tray surrounds
- Vanity and shelving
- Pipe coverings

\*Thickness 12.5mm, 20mm and 30mm only available for indent orders.
